

ACT NOW

To keep bears headed down a wild path

- 1) Take down bird feeders and clean up all residue of seeds and suet.
- 2) Take all of your garbage to the dump. Store garbage in a secure shed or bear proof garbage cans. Do not let garbage accumulate at your home or business.
- 3) Store pet and farm animal food in bear proof barrels or in a secure shed. Never leave food out for your pet.
- 4) Use electric fences to protect farm animals
- 5) Move freezers and coolers inside. Never store freezers on your deck or porch.

Your responsible actions will keep bears wild and people safe in our community.
